

List of Experiments in operating systems

Sr. No.	Title of Experiments	Page No.	Date
1	Hand on Unix commands.		
2	write a program for copying content of one file to other.		
3	Implementation of FCFS CPU Scheduling algorithms.		
4	Implementation of SJF CPU Scheduling algorithms.		
5)	Implement producer consumer problem with bounded buffer.		
7)	Implement of various memory allocation algorithm.		
6)	Implement producer consumer problem with bounded buffer solution with Semaphore.		

Sr. No.	Title of Experiments	Pa N
8	Implementation of FIFO page replacement algorithms	
9	Write a program illustrating various file handling functions	
10	Implementation of FCFS disk scheduling algorithm.
